

## Easily understood and handled by the touch of a finger

This device's unique safety, high performance, silence and easy to handle features contribute to lowering the patients' anxiety and to guarantee a good night's sleep. With the aid of innovative technology, sleep•safe was designed to simplify treatment, making it safer and more efficient. Using a large colour touchscreen, patients are guided by easy to read symbols and help menus, during the entire process.

## Sleep Safe™

- System designed to guarantee maximum protection and safety;
- Quiet hydraulic pump system that ensures a good night's sleep;
- Intelligent alarm system for the security and peace of mind;
- Online heating of the solutions eliminating the pre-heating of the solution bag;
- Bag coded bag connectors are checked for glucose strength to ensure that the wrong solution can never be used;
- Disposables sets and bags made from Biofine®, a plasticizer free and environmentally friendly material;
- Patient Card with detailed information about the prescriptions and treatments, allowing patients to travel easily..
